Specifications

Length 1845mm external, 1630mm internal (2345mm with steps in place)
Width 1209mm external, 1097mm internal
Depth <800mm external, 635mm internal.

Colour – any available though porcelain soft white is standard.

Wastes - 1no standard bath waste operated by quarter turn ball valve (supplied but not attached) to fit to 40mm solvent weld pipe.

Lights – up to 4 LED lights can be fitted (the bath is supplied with no lights unless specified).

Bath supplied with: step unit (usually fixed in place but can be left moveable); collar to ensure clean finish against wall IPS; quarter turn valve; fitting instructions.

The birth pool is designed to be quick and easy to install, easy to clean with its one-piece construction and roomy for a pregnant mum-to-be to move about freely throughout labour. Our aim is to make waterbirth available to as many women as possible for a reasonable cost. It is constructed in such a way as to give it the flexibility to be tailored and adapted to your needs. For example, the hatch can go either side.
